Formulary (Preferred Drug List)

(04/01/2021)

INTRODUCTION

We are pleased to provide the 2021 CareFirst Community Health Plan Maryland (CHPMD) Formulary as a useful reference. This formulary can assist providers in selecting clinically appropriate and cost-effective products for their CareFirst CHPMD patients.

The document is reflective of current medical practices of the date on which CareFirst CHPMD completed its standard review.

The CareFirst CHPMD formulary is intended as a reference for drug therapy selection. It is not intended to be comprehensive in nature nor is it a substitute for the knowledge, expertise, skill, and judgment of the prescriber in his or her choice of prescription drugs. Specific drug selection for an individual patient rests solely with the prescriber.

The CareFirst CHPMD formulary is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any provider based upon reliance, in whole or in part, on the information contained herein. The provider should consult the drug manufacturer's product literature or standard drug references for more detailed information.

PREFACE

The formulary is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action- how the drug produces an effect in the body.

Drugs represented in this formulary may have varying cost to the plan member based on the plan's benefit structure. Generic drugs typically are available at a lower member out-of-pocket cost while brand-name drugs will generally cost more than generics and have a higher member out-of-pocket cost. Generic drugs should be prescribed first-line as much as possible unless a patient has experienced an adverse effect and/or a lack of therapeutic outcome after using a sufficient dose for an appropriate period of time.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The CareFirst CHPMD Pharmacy and Therapeutics Committee (“P&T Committee”) is an external advisory body of CareFirst CHPMD network physicians and pharmacists. These clinical professionals are utilized to determine the drugs to include on the formulary, providing insights to the safety and clinical effectiveness of drug therapies. Voting members of the P&T Committee must disclose any financial relationship(s) and/or conflict(s) of interest with all pharmaceutical manufacturers and affiliations.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than prescribed brand-name product. Drug listed in lowercase indicates generic availability. In most instances, when a generic drug of a brand-name drug is released into the market it is covered and the associated brand-name drug will become non-formulary or not covered. Drugs prescribed are subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Generic drugs are usually priced lower than their brand-name counterparts. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generic drugs may be different from the brand in size, color, and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

SPECIALTY PLAN DESIGN

Specialty Guideline Management (SGM)

SGM is our utilization management program that helps ensure appropriate utilization of specialty drugs based on currently accepted evidence-based medicine guidelines. The utilization management program is available for all therapeutic areas dispensed by our specialty pharmacies. SGM is designed to help ensure safety and efficacy while preventing off-guideline utilization. Drugs which may be included in the SGM program are identified in the formulary as “SP” for your reference.

Note: Specialty drugs can only be dispensed by the CVS Specialty Pharmacy and select University of Maryland Medical System Pharmacies. Providers: please contact either **CVS Specialty**, Call: 1-800-237-2767, Fax: 1-800-323-2445 or **University of Maryland Medical System (UMMS) Pharmacy Services**, Call: 855-547-4276, Fax: 410-684-3776.

For more information on the Specialty Medications and a list of network Specialty pharmacies, please go to our website [Pharmaceutical Management Procedures | CareFirst Community Health Plan Maryland \(carefirstchpmd.com\)](#) and click on Specialty Medications.

PLAN DESIGN

The formulary represents a closed formulary plan design. The drugs listed on the formulary are covered by the plan as represented and drugs not listed are not covered unless a non-formulary exception is pre-approved for coverage. Certain drugs on the list are covered if utilization criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.); requests for use of such drugs outside of their listed criteria will be reviewed for medical necessity. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria. Log into www.Carefirstchpmd.com to check the coverage of drugs on the formulary.

AUTHORIZATIONS

Authorization requests for both **NON-FORMULARY** and **FORMULARY** products requiring either a PA (Prior Authorization), QL (Quantity Limit), ST (Step Therapy) or medical necessity review-contact **CVS Caremark**® at: 1-877-418-4133.

Authorization requests for specific **MENTAL HEALTH** products contact the Maryland Department of Health (MDH) at: 1-800-932-3918 (Antipsychotic Peer Review Line for children 0-9 years old: 1-855-283-0876).

HIV TREATMENT

Effective 01/01/2020, HIV drugs will no longer be processed by the Maryland Medicaid Fee For Service program. HIV drugs are now covered under the pharmacy benefit at CareFirst CHPMD. CareFirst CHPMD requires a copay of \$0 for generic drugs and \$3 for brand drugs. If a member is unable to pay a brand drug copay, the dispensing pharmacy must contact the CVS Help Desk at 1-800-345-5413 for assistance.

Formulary restrictions were implemented on 07/01/2020. Members 21 years of age or younger will not be subject to formulary restrictions in the antiretroviral class.

FORMULARY CHANGES/UPDATES

CareFirst CHPMD may add/or remove drugs from the drug list throughout the year. The formulary changes are reviewed and approved by the Pharmacy and Therapeutics (P & T) Committee or added/removed from the formulary based on the latest medical literature. Monthly formulary changes are posted onto the website at www.Carefirstchpmd.com.

OPIOIDS

The quantity of opioid products prescribed (including those that are combined with acetaminophen, aspirin, or ibuprofen) will be limited to up to 90 morphine milligram equivalents (MME) per day based on a 30-day supply. **Prescriptions that exceed the 90 MME daily limit will be subject to UM criteria, such as prior authorization.** Members who are

opioid-naïve may be subject to additional step therapy requirements [use of an immediate release (IR) formulation will be required before moving to an extended-release (ER) formulation and quantity limit restrictions (first fill will be limited to seven days)].

Note: The quantity limits outlined in the formulary reflect post one (1) month Limit of ≤ 200 MME/day (per 25 days).

BLOOD GLUCOSE METER TEST STRIPS AND LANCETS

One Touch by Lifescan, previously owned by Johnson and Johnson (J&J), is the preferred covered blood glucose meter and test strips for CareFirst CHPMD members. Test strips have a quantity limit of 200 strips every 25 days.

ALCOHOL SWABS

Effective 11/01/2020, formulary alcohol swabs will be limited to a maximum cost of \$10 per month. A majority of alcohol swabs available on the market costs less than \$10. Note: The existing quantity limit of 200 alcohol swabs every 25 days remains.
